I would like the FCC to reject NAB's petition 04-160. There is no reason why XM should not be allowed to offer any programming it chooses. Customer's such as myself pay for these services and fully support and request any improvements in XM's programming.

I've waited for quite sometime for information such as Instant Traffic and weather to be offered by XM. As a long distance commuter, how can this not be appreciated and desireable?

No one has the right to block such programming!!!
